

The complete corpus of medieval translations of the works of Aristotle

The critical edition of the Medieval Latin Aristotle is one of the main projects supervised and supported by the Union Académique Internationale / International Union of Academies. The most important objective of the project is to bring to scholarly attention the various forms in which Aristotle's texts came to be read in the West. The **Latin versions** of these texts constituted the main tools for the study of science and philosophy in the Middle Ages. They were considered as being the canonized *littera* to which all the commentaries on Aristotle's works referred. The role played by these translations in the development of the Western philosophical and scientific terminology can thus hardly be overestimated. All the texts that have been critically edited in the series *Aristoteles Latinus* are now available online together with the texts not yet available in a critical edition.

Key Features

- Academic partners: International Union of Academies, Aristoteles Latinus Centre (Katholieke Universiteit Leuven) and Centre 'Traditio Litterarum Occidentalium'
- The texts constitute the main tools for the study of science and philosophy in the Middle Ages
- Interface in English, French, German and Italian
- The powerful search-software enables the users to undertake enhanced search possibilities:
 - by using wildcards and Booleans operators, the user can construct complex search queries
 - filters are used when, instead of searching through the entire data set, one wishes to restrict the search to a particular Author or group of Authors, a particular Work, a particular Period or Century

Related Databases

- The interface is the same as Brepols full-text databases (*Library of Latin Texts - Series A & Series B*, *Monumenta Germaniae Historica* and *Archive of Celtic-Latin Literature*) and the *Cross Database Search Tool* allows the user to search all of these databases together
- Live links to the *Database of Latin Dictionaries*: a user can select a word found in a text of ALD and automatically find entries on the word in the constituent dictionaries of the *Database of Latin Dictionaries*
- The cluster *Brepols Latin Complete* includes all Latin full-text databases and dictionaries
