

Database of Latin Dictionaries

Because of its broad spectrum of dictionaries, the *Database of Latin Dictionaries* (*DLD*) offers an immediate overview of Latin vocabulary that no isolated dictionary can give.

In order to cover all possible perspectives on Latin vocabulary, the *DLD* offers **several kinds of dictionaries**: defining and translating, thematic, medieval and early modern. Therefore, the *DLD* is a major tool both for students learning Latin and for experienced scholars.

The interface provides first-time users with a simple search option, while the more experienced can explore the advanced search possibilities where all kinds of words or expressions, Latin or Non-Latin, can be the object of complex queries using various criteria, singly or in combination.

Starting in 2005 with only two dictionaries, it has now grown into a large collection of 26 dictionaries. Each year at least one dictionary is added and various improvements are made to the existing ones. These improvements can be corrections to the original text, increased search possibilities or the addition of newly published *addenda*. The *DLD* strives to give its users the best and most up-to-date information.
